The Path Forward…

HUD HBCU Conference
March 8, 2011

Earnestine Psalmonds
Senior Program Officer
The National Academies
Our sources for the S&E workforce are uncertain.
The demographics of our domestic population are shifting dramatically.
Diversity is an asset and an opportunity.
This is a transformative moment for the nation to seize so that we do not fail future generations.
HIGHER EDUCATION INDICATORS

• Demographic shifts
• Workforce trends
• Enrollment and degree production
• Cost of higher education in U.S.
• National report card
• International comparisons
Determinants of Global Competitiveness

- Human capital
- Innovation capacity
- Entrepreneurship
- Information Technology Infrastructure
- Economic policy
- Economic performance

Student Population Projected to be 50% URMS by 2050 U.S. Population 18-24 Years Old, by Race/Ethnicity: July 1990-99 & Projections to 2050

Racial/Ethnic Group as a Share of Total Enrollment, by Type of Institution: 1995 to 2005 (Selected Years)

Four-Year Institutions

- Whites: 72% in 1995, 66% in 2005
- All Minorities: 23% in 1995, 21% in 2005
- African Americans: 10% in 1995, 10% in 2005
- Hispanics: 1% in 1995, 1% in 2005
- Asian Americans: 6% in 1995, 6% in 2005
- American Indians: 1% in 1995, 1% in 2005

Two-Year Institutions

- Whites: 60% in 1995, 67% in 2005
- All Minorities: 33% in 1995, 33% in 2005
- African Americans: 29% in 1995, 29% in 2005
- Hispanics: 11% in 1995, 13% in 2005
- Asian Americans: 6% in 1995, 6% in 2005
- American Indians: 1% in 1995, 1% in 2005

Note: Details do not add to 100 percent due to foreign students and students of unknown race/ethnicity who are not shown but accounted for in the total enrollment.

**Minorities in Higher Education 2008, American Council on Education**
Postsecondary Attainment

• There is a strong connection between increasing educational attainment in the United States and the global leadership of our economy.

• Calls—from the College Board, the Lumina and Gates Foundations, and the Administration—to increase the postsecondary completion rate from 39 to 55 or 60 percent.

• The challenge is greatest for underrepresented minorities:
  – In 2006 only 26 percent of African Americans, 24 percent of Native Americans and Pacific Islanders, and 18 percent of Hispanics in the 25-34-year old cohort had attained at least an associate degree.
Coming to Our Senses: Education and the American Future (2008)

- Provide preschool education
- Improve middle and high school counseling
- Implement dropout prevention programs
- Improve teacher quality
- Provide more need-based grant aid
- Keep college affordable
- Increase college completion rates
- Align K-12 system with international standards and college admissions expectations
- Clarify and simplify the admissions process
- Enable postsecondary opportunity as element of adult education

Four- and Five-Year Completion Rates of 2004 Freshmen, by Initial Major Aspiration and Race/Ethnicity

SOURCE: University of California Los Angeles Higher Education Research Institute
Underrepresented minorities represent 36% of 18-24 year olds account for a small percentage of degree recipients.

Underrepresented minorities includes U.S. citizens and permanent residents who are African American, American Indian/Alaska Native or Hispanic. Members of these groups account for 36% of U.S. 18-24 year olds. “Life Sciences” excludes the health and medical fields at the Bachelor’s and Master’s levels consistent with the NSF definition of “STEM”. Denominators: all degrees within the field awarded by U.S. colleges and universities.

Source: Analysis of data from Integrated Postsecondary Education Data System accessed via National Science Foundation's WebCASPAR system, December 2010. Underrepresented Minorities as a Percent of All STEM Degrees, by Degree Level and Broad Field, 2009. Underrepresented minorities includes U.S. citizens and permanent residents who are African American, American Indian/Alaska Native or Hispanic. Members of these groups account for 36% of U.S. 18-24 year olds. “Life Sciences” excludes the health and medical fields at the Bachelor’s and Master’s levels consistent with the NSF definition of “STEM”. Denominators: all degrees within the field awarded by U.S. colleges and universities.
National Academies’ Committee on Prospering in the Global Economy of the 21st Century: Recommendations

- 10,000 teachers, 10 million minds, and K-12 science and mathematics education
- Sowing the seeds through science and engineering research
- Best and brightest in science and engineering higher education
- Incentives for innovation

- Divergent skill levels
- Changing economy
- Demographic shifts

Source: The Educational Testing Service
HUD Policy Drivers

- Housing crisis
- Homelessness
- Poverty
- Changing demographics
- Community revitalization
Program Development Guidelines

- Resources and sustainability
- Coordination and integration – agencies, programs
- Focus on multiple dimensions of the issue
- Program design – innovative or replicative, strategic
- Solid program execution
- Program evaluation
- Knowledge sharing with community of practice

Moving Forward …

• Align program priorities with national needs
• Connect to K-12 and community colleges
• Create a synergistic community of scholars around community development themes
• Implement promising practices that are replicable and scalable (design principles)
• Leverage strengths, intellectual assets, and resources
• Establish brain trusts for innovative programs
• Develop realistic metrics to assess impact
Dear God, be good to me;
The sea is so wide,
And my boat is so small.

Lines from the Breton Fisherman’s Prayer
