Strategies for Strengthening Communities

“A Focus on Workforce Development”

Office of University Partnerships 2012 National Conference
Wednesday, April 24, 2012

Janice B. Sneed
Vice Chancellor for Community and Workforce Development
Southern University at Shreveport
Right now, most states have their attention on student access, student achievement, and degree completion in colleges and universities. To ameliorate problems, states have been creating—largely through their education systems—an entire infrastructure for boosting students’ likelihood of succeeding in and graduating from college. But the changes we need do not end there. A new era of educational strength and economic competitiveness lies not only in colleges and universities getting more Americans into—and successfully out of—college, but also in colleges and universities helping create new, good paying jobs in the economy and getting workers—both young people and working adults—ready for those jobs.

—NGA Center for Best Practices, March 2011
Mission Statement

Southern University at Shreveport Louisiana (SUSLA), an autonomous unit of the Southern University A&M System, seeks to provide quality education for its students (while being committed to the total community). This institution awards certificates and associate degrees; prepares students for careers in technical and occupational fields; and offers courses and programs that are transferable to other colleges and universities. Dedicated to excellence in instruction and community service, this open enrollment institution promotes cultural diversity, provides developmental and continuing education, and seeks partnerships with business and industry.
SUSLA Ranked 22th in Enrollment in National Publication

Southern University at Shreveport is one of the fastest growing public two-year colleges in the nation according to the U.S. Department of Education’s National Center for Educational Statistics (NCES).
SUSLA Ranked Top 56th Degree Producing Institution Nationally
SUSLA Identified as “National Top Performer”

SUSLA received national recognition by the University of Texas at Austin - 2010 Community College Survey of Student Engagement (CCSSE), as being one of the top performers amongst 322 two-year institutions in the United States. According to students surveyed, SUSLA was identified as a “top performer” in two out of the five benchmarks used to compare performances with that of similar institutions and participating CCSEE community colleges.

The findings of the survey served to promote the institution and its educational practices as one of the best in the nation.

“The Empowerment of People and Communities through Education and Training to affect Positive Change”
CWD Core Values

- Commitment to Customer–Centered Initiatives
- Organizational Responsiveness
- Respect for all – Regardless of roles and responsibility
- Education and Professional Development

- Value Academic Excellence
- Accountability and Attainment of Performance Standards
- Linkages, Networking & Collaborations
- Uprightness and Integrity First
- Economic Empowerment
- Service and Leadership
An Appreciation of the Job Market & Clusters
Overview of the U.S. Economy

The Great Recession & the Recovery

- Over 8.8 million jobs lost since recession began in December 2007
  - we have regained only one-fifth of them to date
- Over 14 million people remain unemployed today
- Construction lost over 2 M jobs since the recession
- Manufacturing lost 2 M jobs since the recession
The Financial Sector continued to cut jobs through 2011 due to merger activity among firms.

The Public Sector shed 430,000 since the end of the recession, largely due to budget cuts at the state and local levels.

4.2 M properties have been foreclosed, housing market lost $8 trillion in value since 2007.

Today, 46.2 million people live below the official poverty line, the highest number in 52 years.
Overview of U.S. & Local Economy

Some unemployment rate comparisons:

**U.S. /National**
- December 2011 = 8.3%
- November 2010 = 9.8%
- November 2007 = 4.7%

**Shreveport-Bossier City MSA**
- December 2011 = 5.9%
- November 2010 = 7.3%
- November 2007 = 3.5%

**Monroe MSA**
- December 2011 = 6.9%
- November 2010 = 8.2%
- November 2007 = 3.5%
Predictions for Industry Clusters

Main Sectors with Job Growth Today

- Healthcare
- Information Technology
- Energy: Utilities, Green
- Financial Services
Predictions for Industry Clusters

The gap between industries that lost jobs vs. industries that are hiring:

<table>
<thead>
<tr>
<th>Jobs Lost</th>
<th>vs.</th>
<th>Jobs Available</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto (manufacturing)</td>
<td></td>
<td>Healthcare</td>
</tr>
<tr>
<td>Construction</td>
<td></td>
<td>IT/Engineering</td>
</tr>
<tr>
<td>Banking</td>
<td></td>
<td>Energy</td>
</tr>
</tbody>
</table>
Healthcare

Nationally, 631,000 people hired in healthcare bt. Dec 2007 & June 2009 ...despite the recession

Since June 2009, job growth in healthcare grew by 3.5%

→ Growth is expected to remain steady in the sector as baby-boomers grow older & obesity increases

→ The need will increase for physical therapists, RNs, cardio technicians & occupational therapists
Predictions for Industry Clusters

Information Technology

- 1 million new technology-related jobs will be created over the next four years -- an increase of about 10%

- Database administrator jobs: a hot field with ample opportunity for growth

The intermingling of healthcare & IT – stemming from increased pressure to digitalize medical records - could provide a large number of new jobs
Energy: Utilities, Green

- Nationwide, turnover for utilities positions will be high in the coming decade as older workers retire
  
  → 2008: 53% of utilities workforce was age 45 or older

  * Jobs include support staff, technology workers & analysts

- Moreover, the job-creation potential of the green economy is immense
  
  → Jobs range from jobs high-paying science & research, engineering and legal fields to low & semi-skilled workers in construction and manufacturing
Predictions for Industry Clusters

Financial Services

Accountant jobs: growth of 22% predicted in the next decade

- Financial advisers: growth of 41% predicted over the next decade
- The actuarial field: growth of 24% predicted over the next decade
To meet these industry demands, communities will need to:

- Upgrade the skills of existing workers
- Begin transitioning the workforce to new skill sets today - to be prepared for tomorrow!
- Attract new talent and youth
Opportunities for Higher Education in creating our future
General Electric chooses New Orleans for 300-job tech office

Published: Friday, February 17, 2012, 10:45 PM   Updated: Saturday, February 18, 2012, 6:20 AM

By Jaquetta White, The Times-Picayune

"This place is what's best in America. We saw it in this competition."

Appliance giant General Electric plans to open a corporate office in New Orleans that will provide software development and information technology support to the company's financial services arm, GE officials, along with state, regional and local leaders, said Friday. The GE Technology Center, a part of GE Capital, will result in about 300 jobs in computer engineering, software development and other information technology-related fields that pay annual salaries of between $60,000 and $100,000.

GE chose New Orleans over about a dozen other cities, including finalist Indianapolis.

"We were not without people who wanted us to locate this technology center in their city and state," said Brackett Denniston, senior vice president and general counsel of GE. "This place is what's best in America."

This article is available in PDF.
“Speed to Market and Close to Customer”

Ed Barlow, Futurist
“Speed to Market and Close to Customer”

1. Implement a series of initiatives that expedite the number of degrees produced and the speed at which degrees are produced.

2. Enhance the production of degrees in high-demand programs that are needed for the modern Louisiana economy.

3. Give students incentives to complete a degree and to work in Louisiana.
Directly supporting industry by providing crafted courses

Awarding college credits for industry training
both received significant indirect investment from municipal governments and local residents.

In the long term, the shift could ... give municipalities and local residents, who have long derived significant economic benefit from the presence of a college campus, a greater stake in institutional ownership.
Activity-Based Budgeting – is a system in which individual units . . . keep most of the money they bring in, but must also pay whatever expenses they incur . . . the system will drive schools and colleges, as well as individual faculty members, to create . . . programs that attract students, tuition revenue, and grants, which the schools will then get to keep and reinvest.

It will drive them to better use space, grow class sizes where possible and advisable, and cut down on overhead, since savings on expenditures will be kept by the unit generating the savings.
Seek Revenue Streams that are compatible with the mission and soul of the university

- Work to have all Academic departments produce the credit hour production large enough to pay for their faculty.
- Sequence courses so that students graduate within a four-year time period (or less). *
- Group courses in a block so that students can take required course in a steady sequence.
  - provides for interdisciplinary instructional opportunities and community building among students.
  - Maximizes space utilization and student time.
- Expand internships and co-op opportunities in the local community. **
Seek Revenue Streams that are compatible with the mission and soul of the university

- If campus space is underutilized, look into leasing space to
  - Local entities such as non-profit groups which could also provide out-of-classroom experiences for students.
  - Creating business incubators.
  - Leasing to other educational groups that can support higher education efforts.

- Private sponsorships of the higher education experience.
  - Chairs and professorships are sponsored by private sources.
  - Whole academic divisions are sponsored by businesses.
  - Many businesses earn naming rights by giving funds for buildings, music classrooms, computer/technology labs.

- Some businesses actually pay a professor's whole salary in a research or workforce development arrangement.
Seek Revenue Streams that are compatible with the mission and soul of the university

- Create enterprise activities (auxiliaries) that provide services to community and provide training/work opportunities for students and the community.

WINLA Healthcare Alliance
Project Success
GRANT PURPOSE

To train 325 participants in adult basic education and career pathways of dental hygiene, health information technology, nursing, medical lab technology, radiology technology and respiratory therapy.

Grant Performance Period
The Period of Performance is from March 01, 2010 thru February 28, 2013.

Award Amount
$4,296,308.00
Project Success will operate administratively within the Division of Community & Workforce Development Office of Intake Assistance & Supportive Services Center. Technical Training will be completed within the Division of Allied Health and School of Nursing under the umbrella of Academic Affairs. Personnel in both areas have a working collaboration that focuses on providing the best service possible for the benefit of the trainees.

Start up and facilitation of this program will be administered by Co-Directors Linda V. Hines and Stephanie Graham. Other employees that will assist with the grant are:

- **Project Manager**: Kendra Lane
- **Data Control Specialist**: LaTarus Richardson
- **Eligibility Clerk**: Ms. C. James
- **Case Manager / Job Specialist**: Malcolm Baker
- **Case Manager / Job Specialist**: Flecia Washington
- **Adult Basic Instructor**: Shelia Revell
- **Allied Health Tutor**: Melanie McCoy
- **Driver**: Mr. Rascoe

Program Strategies

The project will implement a “ladder curriculum/career ladder”. This strategy also serves as a structure for adult education from unemployment/underemployment to employment in high-demand fields. Project staff will ensure each participant is engaged in each of the following:

1. **Personal Needs.** The Intake Assistance and Supportive Services Center (IASSC) will be the first encounter for all participants. Here they will complete applications, undergo assessments, identify barriers to completion and complete a “Strategy for Success” (individualized training plan). For counseling services beyond the scope of the IASSC, a network of government and community agencies is available for referral. Other needs–based payments will be provided with limitations.

2. **Academic Skills.** One qualified Adult Basic Education instructor will be hired to work with the adults seeking their GED. ABE students will be in training 5–6 hours per day, Monday to Thursday. Clinical students will follow the appropriate curricula for their program. All allied health and nursing programs are nationally accredited. Students needing tutoring with general education courses will be referred to the university’s tutorial lab.

3. **Career Focus.** Students will be steered toward a ladder curriculum that best correlates to the career of their choice based on their interests, strengths and assessment.

4. **Career and Technical Skills.** In this stage, students hone their skills through the academic arena and receive credentials aligned with area of concentration. ABE students will simultaneously work on GED prep and technical skill training in dental assisting, CNA or EKG technician. All will be required to take a medical terminology course. These areas of technical training will be non–credit courses. For clinical students, the project will hire two technical skill tutors to assist students having difficulty. Qualified faculty will be in place to instruct the technical portion of curricula. Each program of training has a skills lab where students participate in hands–on learning and where technological remediation can take place. Training will be conducted on semester basis.
5. **Employability Skills.** All ABE participants will be required to complete the ACT Key train curriculum to reinforce “soft skills”. All participants will acquire job-search, application and interview skills.

6. **Job Entry Skills/Placement.** License exam prep and registry review seminars will be conducted on-site. Placement activities include, but are not limited to, career fairs specifically for healthcare jobs, interview and resume writing assistance, and faculty/staff referrals. The university has an online career services center that allows students to post resume and perform job searches. This same mechanism allows employers to post vacancies, view resumes and contact students directly. As stated earlier, many area hospitals and clinics serve as clinical sites for our programs and ultimately hire them at completion. Staff will engage in proactive services to guide participants through the job search process. All completers will have a resume on file in the project office for dissemination to potential employers.

7. **Advanced Skills/Retention.** These are the long-term plans for each participant as outlined in their “Strategy for Success”. Project staff will work with academic programs to conduct employer surveys and follow-up with program completers to address any new barriers—transportation, needs-based payment, etc. For some, they may transfer

  Texas/Louisiana

TENANTS
- Speech Therapy Unlimited Hallelujah, LLC
- Westaff Employment Agency
- MLD and Associates
- Wade Carter Tax Service
- JHampton Enterprises
Program initiated in Spring 2004
Initial and subsequent funding from HUD HBCU grants
Admitted twelve businesses into the program
Two businesses graduated
Created 16 new jobs (owners not included)
Provide technical assistance to an average of 125 per year
Entrepreneurship Training

- Twelve individual classes
- Enrollment of 20 students per year
- Presenters are experts in each subject area
- Networking opportunities
- Assistance with business plan development
Intense Technical Assistance

- Each Business Gives a One Year Commitment
- Companies are assigned to a management, marketing, and accounting consultant
- Consultants assess the businesses and provide TA and recommendations monthly
- Goal is to Increase Profit, Market Share and Create Jobs
- Spent $ 80,000 over two years
- Worked with 12 business owners
- Five African American Business Owners were contracted as consultants (Chronicles of Numbers, Bledsoe, Dotson, & Associates, Cawthorne Financial Services, Tiya Scroggins Consulting, and BMK Marketing)
Business Opportunity Grants

- Started in 2005 with funds from City of Shreveport
- Provide up $2500 to businesses
- Utilized for equipment purchases
- Awarded over $117,000 to 60 business owners
21 businesses registered with URAP Center
Nine (9) awarded grants in the amount of $1,000.00 each
Grants given to re-establish business and build capacity in area
LED Small and Emerging Business Development

- Provide program for five years
- Received $155,000 in funds
- Awarded $125,000 in contracts to African American businesses
- Provided services and training to 152 business owners
SEBD Success Stories

Definition Magazine

Allean Pratt,
Owner of Children’s Escape Spa
“I was introduced to the small business incubator at Southern University– Shreveport toward the beginning of this year. I did not know what to expect, only that I needed help with my idea for a new publication that would define the print media market for the African American community. I met with Saundra Williams on several occasions as well as Dr. Darren Dixon to discuss my ideas and thoughts for Definition Magazine. I was thrilled to find out that this service was willing to pay the majority of our cost for graphic design as well as our website, definition247.com!

This gave us the start that we so desperately needed. Since then we have grown immensely. Because of the assistance from SUSLA’s business incubator, Definition Magazine currently employs an 11 member staff, including a 7 member editorial board, full-service graphics department, and sales staff. Thank you, Southern University!!”

Teddy Holmes, Owner
Youth Entrepreneurship

WINLA Healthcare Alliance

Program Goals

- helping low-income, under-credentialed employees and jobseekers progress toward economic self-sufficiency and

- helping employers meet their needs for a skilled workforce.

The Workforce Innovations for Northwest Louisiana Funder Collaborative is a partnership funded by the National Fund for Workforce Solutions, the Social Innovation Fund, and the following regional contributors: Caddo Parish Commission, Capital One Bank, City of Shreveport, Community Foundation of North Louisiana, Greater Shreveport Chamber of Commerce, Foundation for Louisiana, JPMorgan Chase, and United Way of Northwest Louisiana
WINLA Objectives...

- Involve employers as active partners and leaders in the planning and implementation of the workforce partnership.
- Expand awareness of the broad array of career opportunities in the health care and energy fields.
- Offer high-quality, “real-world” curricula and internships.
- Strengthen alignment between adult basic education and post-secondary programs.
- Offer multiple pathways and/or career ladders that enable individuals to move up the wage scale.
- Reduce barriers that limit access to career preparation.
- Promote development of better workforce policies and practices.
- Implement efforts to achieve and sustain workforce system change and innovation.
Adult Education
SUSLA’s Current Adult Education Program

- Youth Network Initiative (YNI) – WIA COS Funded – US DOLETA
- Jobs For America’s Graduates (JAG)
- Project Success – US DOLETA
- Work Ready – U
- Accelerated Opportunities (literacy consortium)

Offices of Responsibility

Workforce Development, Adult Education, Intake Assistance and Supportive Services and the OSPs
THE STAR ACADEMY IS A PROGRAM IN THE ADULT EDUCATION DEPARTMENT IN THE DIVISION OF COMMUNITY AND WORKFORCE DEVELOPMENT (CWD). THE PROGRAM CURRICULUM IS DESIGNED TO ASSIST HIGH SCHOOL DROPOUTS ATTAIN THEIR GED WHILE BEING DUALLY ENROLLED IN COLLEGE LEVEL CREDIT COURSES.
What Makes it Works....

Partners........

- City of Shreveport–Community Development
- Housing and Urban Development
- Community Foundation
- Consortium of Education Research Technology (CERT)
- Local Chambers and Economic Development groups
Summary of Workforce Strategies

- Underserved/Underprepared (A new student)
- Adult Literacy
- Secondary Relations – dual enrollment and career pathways
- Employer Driven Solutions
- Essential Components (diversified group of partners and supportive services)
Summary of Workforce Strategies

- Meeting students where they are...there's a solution for everyone
- Designing high-intensity “bridge” courses to help students make transitions to post secondary education
- Accelerated career pathways
- Accommodate the needs of working and non-working adults and employers
A New Approach

The two policy agendas for higher education – one for more students and more degrees, the other for better workers and better jobs – are inextricably linked. Pursuing them simultaneously may eventually gather enough collective momentum to usher the United States into a new era of job creation, American competitiveness and shared prosperity.
